MASQUE  **SOUND**

Custom Fabrication

From custom products to modifications of existing work, Masque Fabrication can build what you need with speed, accuracy, and outstanding workmanship. Contact us to see how we can help fabricate and build custom products for your next project.

Metal Fabrication

We often fabricate custom metalwork for our shows and are also available for outside contracting. Our fabrication facility is managed by Felix Kutlik, with a staff of expert craftsmen on hand. Some of our common fabrication projects include:

- Yokes (speaker, video monitors, etc.)
- Console doghouses
- Speaker towers
- Tilt Tables

We can also fabricate virtually any other kind of equipment you can think of. We routinely work in steel, aluminum, brass, copper, and other metals. Our services include:

- Milling
- Plasma cutting
- Machining
- Welding
- Lathe work
- Pipe work

Woodworking

Masque Fabrication also has complete woodworking capabilities. Our woodshop is run by Jack Parow and produces a wide range of equipment, including:

- Racks (inserts and shipping surrounds)
- Cable trunks
- Console cases
- Equipment-specific shipping inserts
- Pit baffles

Manufacturing

Our manufacturing facility in Tampa, Florida assembles the electronic portions of our products and is also available for short run manufacturing. Managed by Dave Shoman, the shop has a wave soldering machine and a full time assembly staff.
